

FLEXi Display Marketing LCD Monitor Options

Using printed graphics and lamination, we turn standard LCD monitors into fantastic displays. Printed materials are cut to form fit the monitor, acting as both a focal point in your display and an additional protective layer for your monitor. Like all FLEXi graphics, these printed pieces are hook-and-loop attached and easily removable for servicing your LCD or

Many of our customers ask that we custom fit their LCD into the panel. This feature can be used stand alone or with a printed or acrylic front panel. As seen here, the LCDs are fitted snug into the panel cavity and completed with carpet, giving it a finished look and feel that adds stability to the LCD and a touch of class to your display. Ask us about pricing on custom fitting your LCD monitor, television, speakers or other peripherals into panels.

For the protection of your investment, a hard plastic backing plate is added to every LCD panel. This plate is custom fitted to the panel, using high grade hook-and-loop Velcro (R)-type connections to attach. Able to be adjusted by hand yet strong enough to hold several pounds in place, these backing plates are also flexible enough to allow room for your monitor and power cables.
